Subject: microsoft settelment

By accepting this settlement offer from Microsoft you are perpetuating the very thing you fought against, and won, in court. Allowing Microsoft to pay off their guilty verdict with their own software etc you only allow them to increase an already staggering monopoly by infiltrating the one arena they have not been able to compete - education.

Should Microsoft be allowed to compete? Yes. Should that that competition be unfair? No. You people have the legal right to impose a settlement that sends a message to Redmond infroming them that unfair business practices will not be tolarated.

The consumer is hurt by this proposed settlement.
